

PHOSPRO 17

A PHOSPHATE, SALT, TRACE MINERAL & PROTEIN SUPPLEMENT

With PhosPro 17 not only phosphorus and protein are supplemented to ensure optimal utilization of pastures!

PhosPro 17 provides the following key benefits:

- Is weather resistant due to the inclusion of a unique spray-dried molasses by-product.
- Forms a protective layer to limit rain damage and prevent lick losses through leaching.
- Provides phosphorous in the form of highly available Kynofos21 (Pre-Caecal Digestibility of 80.2%).
- Contains 17 % protein in the form of urea to ensure optimal grass intake.
- Contains all the most important trace minerals in the correct ratio to phosphorous.
- Can be fed to cattle, sheep and goats during the summer or all year round.
- Is ready mixed and can be fed to cattle, sheep and goats without any further mixing. Intake for PhosPro 17 is 100 – 240 g per cattle per day or 18 – 36 g per sheep per day.

Trace Minerals Included:

Cobalt: Important in the manufacturing of vitamin B12.

Copper: Important for growth and haemoglobin formation, iron absorption.

Iodine: Important for a healthy thyroid gland as well as the development of the central nervous system.

Manganese: Important for growth and fertility.

Zinc: Important for growth and a healthy skin.

Selenium: Important for growth, fertility, and the prevention of illnesses.

PhosPro 17 has the following composition:

PhosPro 17	
Product Properties	Typical Analysis
Protein	17% (min)
% from Urea	100% (max)
Total Phosphorus (P)	6% (min)
Calcium	12% (max)
Copper	300 mg/kg
Manganese	1200 mg/kg
Zinc	1200 mg/kg
Iodine	30 mg/kg
Cobalt	3 mg/kg
Selenium	8 mg/kg
