# FORCIX FEED

At birth, young ruminants like calves, lambs, and goat kids are exposed to pathogens such as coccidia. These harmful parasites can disrupt their intestinal environment, causing diarrhoea and hindering their growth.

**FORCIX FEED** is specially formulated to support early health and development of young animals. This phyto-genic blend promotes natural growth and ensures intestinal health, helping your livestock thrive from the start.

## INSTRUCTIONS OF USE

Use, in feed, at a rate that delivers at least 60mg / kg LW for at least 45 days. Please read and follow the label instructions

**Packaging: powder, 25kg bag.**

Keep away from light in a cool ventilated place.

Withhold Period: Nil • ESI: Nil

## CALFBUDDY-MILK

VERSION SUITABLE FOR MILK REPLACER ALSO AVAILABLE
