Vertan

Protein, more efficiently

Vertan is a combination of selected essential oils and a unique blend of plant extracts and spices. **Vertan** is a globally patented product that has been in use for over 20 years.

VERTAN WORKS ON THE NITROGENOUS METABOLISM

Benefits of **Vertan**:

- Reduces the speed of protein degradation in the rumen, lowers ammonia in the rumen
- Increases metabolizable protein
- Lowers blood and milk urea
- Lowers environmental impact (lowers nitrogen content)
- Assists in reducing somatic cells and fertility issues

RECOMMENDED USAGE

Incorporate **Vertan** into the feed.

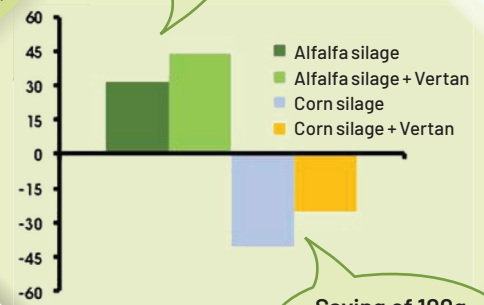

- Dairy Cows:
4 to 12 g/day
- Dairy Goats and Sheep:
1 to 2 g/day

For more information, please contact our Technical team to get the most cost effective dosage appropriate to your feeding practices.

Better usage of proteins

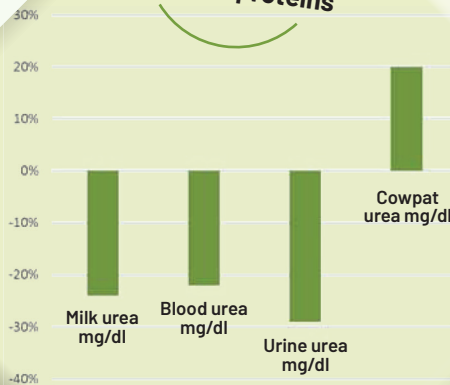

Vertan's effect on the nitrogenous retention depending on the type of basic ration. - IDENA CANADA 2003

Saving of 100g of crude protein/cow/day

Vertan's effect on the nitrogenous system (18% MAT ration) - University of CIAM - Spain, 2015

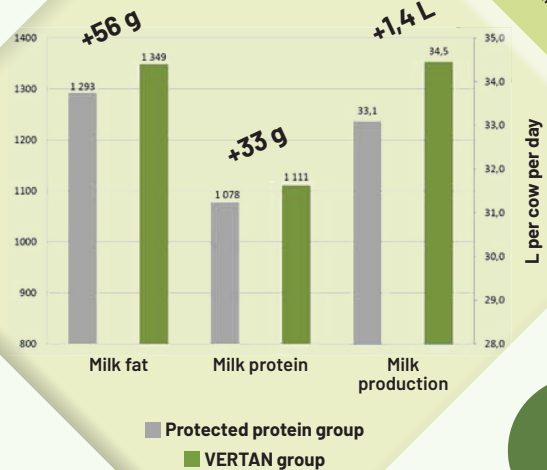

Best return obtained from ingested proteins

Less nitrogen rejection

Average of 6 trials: Vertan vs Negative control
